📄 Summary

Founding engineer with 15+ years building production systems from the ground up—architecting APIs, deploying cloud infrastructure, implementing security controls, and supporting users across the full technical stack.

I combine deep technical expertise across software development, DevOps, and system operations with strong business acumen gained from managing products, marketing campaigns, and cross-functional teams.

From writing code to responding to incidents to training staff, I take ownership of the complete lifecycle and ensure systems are reliable, secure, and maintainable for the long term.

🧰 Experience

Founding Engineer

May 2011 – Present

Home Remodel Buddy, San Francisco, CA

- ▶ Planned and architected internal systems by translating business needs into clear technical specs for scalable, long-term solutions.
- ▶ Built a full CRM from scratch using JavaScript, PHP, and HTML/CSS, streamlining contractor workflows and improving lead management.
- ▶ Designed and implemented RESTful and SOAP APIs with JSON/XML payloads to integrate CRMs, marketing tools, payment systems, and third-party data providers.
- ▶ Developed secure authentication and account-management workflows aligned with IAM best practices.
- ▶ Engineered data provisioning, transformation, and sync pipelines in Python and PHP for MySQL systems.
- ▶ Performed performance tuning across apps and databases, reducing load times and improving responsiveness for large datasets.
- ▶ Conducted load tests and stress tests to validate system behavior under peak traffic.
- ▶ Created proof-of-concept integrations to evaluate new technologies and system enhancements.
- ▶ Authored technical documentation covering APIs, integrations, architecture, and deployment workflows to support maintainability and onboarding.
- ▶ Deployed and maintained bare-metal Linux servers, virtualized environments (Proxmox, bhyve), and containerized stacks using Docker.
- ▶ Implemented CI/CD pipelines to streamline deployments and minimize downtime.
- ▶ Managed cloud infrastructure across AWS and Azure, including server configuration, VPCs, virtual networks, VPNs, and firewalls.
- ▶ Designed and deployed software-defined networking solutions to improve scalability, flexibility, and security.
- ▶ Configured DNS in multi-region cloud environments using Azure DNS and Route 53; implemented DNS-over-HTTPS for secure DNS traffic.
- ▶ Coordinated large-scale system migrations, network upgrades, hardware procurement, and capacity planning.
- ▶ Integrated vendor APIs (Google Maps and others) to enhance internal tools and user-facing features.

⚙️ Skills

Programming languages

Python JavaScript
PHP C++
Bash

Database/Caching

MySQL Redis
Memcached

Tools/Platforms

AWS Azure
Docker Git
Stripe Twilio
Jira Slack

🔧 Other

Data Science

- ▶ Automated recurring maintenance tasks, health checks, log parsing, alerts, and system reporting using Bash and Python.
- ▶ Managed version control workflows using Git and GitHub to ensure stable releases and clean histories.
- ▶ Implemented real-time monitoring and alerting using Grafana, Scout App, Rollbar, Nagios, and custom tooling.
- ▶ Conducted system health audits, applied updates and patches, and performed routine performance checks to maximize uptime.
- ▶ Designed and executed comprehensive disaster-recovery and business-continuity strategies, including off-site backups and full system imaging.
- ▶ Responded to production incidents, including a compromised WordPress server due to a plugin vulnerability, restoring secure functionality rapidly.
- ▶ Developed automated scripts for error detection and reporting to reduce manual intervention and accelerate issue response.
- ▶ Ensured data protection and compliance with PCI requirements for stored customer payment data.
- ▶ Monitored IDS systems, investigated suspicious activity, and executed incident-response protocols for security events.
- ▶ Performed regular security audits, produced detailed reports, and implemented recommended improvements.
- ▶ Managed endpoint protection, antivirus coverage, and system hardening across all environments.
- ▶ Prepared documentation and reports for external auditors and regulatory agencies.
- ▶ Managed Google Ads campaigns and optimized landing pages to improve conversion rates and reduce customer acquisition costs.
- ▶ Built dashboards and analytics tools to track KPIs, campaign performance, and customer funnel metrics in real-time.
- ▶ Designed and implemented A/B testing frameworks to validate product changes and marketing experiments.
- ▶ Conducted user research and gathered feedback to inform product roadmap decisions and feature prioritization.
- ▶ Developed internal tools for operations teams to manage leads, track contractor performance, and process payments.
- ▶ Created automated reporting systems to provide stakeholders with insights on revenue, customer behavior, and system health.
- ▶ Optimized cloud spending and infrastructure costs through resource rightsizing and usage analysis.
- ▶ Provided technical support to internal teams by troubleshooting system issues by phone or onsite, resolving problems quickly.
- ▶ Led training sessions for staff on information-security best practices and operational procedures.
- ▶ Collaborated with cross-functional teams to translate business goals into scalable technical solutions.
- ▶ Delivered consistent after-hours support including nights, weekends, and holidays to maintain service availability.
- ▶ Ensured compliance with IT policies, security procedures, and operational standards across employees and infrastructure.

Media Operations Engineer

Jan 2011 - May 2011

Quotify Technology Inc. (acquired by Telstra), San Francisco, CA

- ▶ Developed and deployed custom WordPress templates for multiple business units.
- ▶ Managed Google Ads campaigns and increased landing page conversion from 8% to 12%.

Partner

Feb 2012 - Jan 2017

Founder's Dojo, San Francisco, CA

- ▶ Mentored early-stage founders on building and troubleshooting minimum viable products.

Education

A.S Business/Economics

2005-2007

Gavilan College, Gilroy, CA

Computer Science Coursework

2003-2005

California Polytechnic University, San Luis Obispo, San Luis Obispo, CA

CS109x: Introduction to Data Science with Python

July, 2025

HarvardX (Online Learning Initiative of Harvard University), <https://courses.edx.org/certificates/af05411c855d4ab7aaf9c8d90b29bd09>

PH125.3x: Data Science: Probability
