📄 Summary

Founding engineer for a production B2B marketplace processing \$2.5M annually for 13 years. Built and operated four integrated systems serving 740+ contractors—API gateway, distribution engine, billing platform, and IVR system. Owned the full stack: Python, PHP, JavaScript, MySQL, AWS/Azure, Stripe integration, and Grafana/Prometheus monitoring. Diagnosed production failures at 2am, optimized database queries from hours to minutes, and recovered security incidents with zero data loss. The proof lives in systems that earned trust by working when it mattered.

🧰 Experience

Founding Engineer

May 2011 – Sept 2024

Home Remodel Buddy, San Francisco, CA

- Primary architect and production owner for a B2B marketplace processing ~\$2.5M annually, serving 740+ contractors.
- Designed and maintained long-lived REST and SOAP APIs supporting internal tools, external partners, billing, and IVR workflows.
- Owned data modeling and persistence in MySQL, including schema design, migrations, indexing, and performance tuning for production-scale datasets.
- Built rule engines and validation pipelines enforcing pricing, eligibility, routing, and billing correctness.
- Diagnosed and resolved complex production issues across application, database, and infrastructure layers, including query performance regressions and data integrity failures.
- Maintained high availability and data integrity across 13 years of continuous production operation, responding to incidents and improving system reliability over time.
- Integrated Stripe payment processing (\$2.5M annually) with webhook event handling, dispute resolution, and automated invoicing.

🎓 Education

A.S Business/Economics

2005-2007

Gavilan College, Gilroy, CA

Computer Science Coursework

2003-2005

California Polytechnic University, San Luis Obispo, San Luis Obispo, CA

CS109x: Introduction to Data Science with Python

July, 2025

HarvardX, <https://courses.edx.org/certificates/af05411c855d4ab7aaf9c8d90b29bd09>

PH125.3x: Data Science: Probability

July, 2025

HarvardX, <https://courses.edx.org/certificates/73a1329507e642a0977384e4344c650e>

⚙ Skills

Languages & Frameworks

Python PHP
JavaScript SQL
Bash

Infrastructure & Data

AWS Azure
Linux MySQL
Docker Git

APIs & Integration

REST SOAP
OAuth Stripe
Webhooks

Monitoring & Operations

Grafana Prometheus
Incident Response
